

Day With the Bankers, the Merchants and the Brokers.

Wall Street Has Very Dull Day

Not One Other This Year That Was as Quiet as Yesterday.

NEW YORK, May 27.—The volume of selling in today's stock market was exceedingly light, but was sufficient to incline the balance toward lower prices. The market did not quite reach the record for dullness touched earlier in the year on March 10, when the aggregate sales amounted to only 74,000. But today's total of 118,000 shares fell little to pass between them. The lullness of the day, however, added to the general discouragement of the speculation, was the cause of the aggravated apathy of the market.

The promise of a growth in cash resources of the banks to the extent of \$10,000,000 stimulated no interest in stocks. Of this amount the sub-treasury has contributed \$4,000,000, and the \$6,000,000 paid to the banks last week for the account of the Panama republic, has also been deposited by the recall of Government deposits. The flood of currency in the interior, estimated to have amounted to upward of \$6,000,000 in favor of the banks, has also been a factor in the demand for money in business circles. The demand for money in business circles, however, has been a factor in the demand for money in business circles.

The amount of gold bars available for export tomorrow proved to be only \$500,000, but the sterling exchange continued to advance in the price of gold in London, which probably marked the passing of the demand for gold in that market, as the price of gold in London has been a factor in the demand for money in business circles.

The stock market has fallen back into a lethargic condition this week. Dealings have been scarcely stirred up by the rise in the price of gold in London, but the market has not yet reached the level of the preceding Friday. The rest of the week was stagnant, with the price of gold in London a factor in the demand for money in business circles.

The tendency toward congestion in many of the banks has been a factor in the demand for money in business circles. The current redemption of bank notes at the rate of nearly a million dollars a day for May, may have become almost a drag on the market, but the market has not yet reached the level of the preceding Friday.

The current redemption of bank notes at the rate of nearly a million dollars a day for May, may have become almost a drag on the market, but the market has not yet reached the level of the preceding Friday. The current redemption of bank notes at the rate of nearly a million dollars a day for May, may have become almost a drag on the market, but the market has not yet reached the level of the preceding Friday.

SPRING CHICKENS ARE DISAPPOINTING

Very Few of This Year's Crop Have Appeared in Local Market—Price Is High.

SPRING chickens should be ripe at this time, but for some reason the season is backward, both in Utah and the East. A very few small invoices have been received by local commission men during the past week and there is disappointment among both dealers and consumers. It is believed that the Eastern product is being packed as fast as it comes in, but a special reason appears for the home shortage. Wholesale dealers are paying 27 cents a pound for the few springers they are able to buy, and they are sold to retail dealers at 60 and 65 cents apiece. Poultry of last year's vintage, both Utah and Eastern, is quite plentiful.

There was a good trade in fish yesterday, and the supply of all the popular varieties was ample to meet the demand. Oats continue scarce, with the possibility of a further advance in price before the new crop appears.

Strawberries still lead easily in the fresh fruit market and the supply and quality are both quite satisfactory. The season has not yet begun in California, and Texas berries will be showing up shortly.
